```java
package com;

public class PhoneBuilder {

    private String os;
    private String pro;
    private int bat;

    public PhoneBuilder setOs(String os) {
        this.os = os;
        return this;
    }

    public PhoneBuilder setPro(String pro) {
        this.pro = pro;
        return this;
    }

    public PhoneBuilder setBat(int bat) {
        this.bat = bat;
        return this;
    }

    public Phone getPhone() {
        return new Phone(os, pro, bat);
    }
}
```
