```java
package com;

public class SingletonMain {

    public static void main(String[] args){

        Singleton sc=Singleton.getInstance();
        sc.showMsg();
    }

}
```

```java
package com;

public class Singleton {

    private static Singleton instance;

    private Singleton(){}

    public static synchronized Singleton getInstance(){
        if(instance == null){
            instance = new Singleton();
        }
        return instance;
    }

    public void showMsg(){
        System.out.println("Singleton Class Method Called");
    }

}
```
